

## BOY SCOUT NEWS NOTES

BY THE S. M.

There is nothing ne'er to hear in the springtime than the pleasant chirping of the birds—such as the meadow larks, wrens, etc., and to observe their methods of keeping house is even more interesting, such as the Mr. Wren who stands by his mate and in my Scout hat when we were at camp last year!

Unfortunate, however, there are some birds who have not had the advantage of being shown bird life from the bird's point of view, and I am referring here to the small car following that age-old custom and shall I say brutal—custom of "birdnesting". No human mother or father would let others rob them of their children, kidnapped and the home destroyed, yet what about the feelings of the parent birds? What must they feel like to return home and find their eggs destroyed or stolen and probably the nest also smashed?

Again you may protest that it is the act of a raven or some other article of which you are justly proud! If it is stolen you promptly complain to the police, and if it is your wife who cares to hear! Yet you think nothing of stealing the lives of birds, do you? Oh, no, you say, it is the mother and father birds. And lastly, after you have a "hobby" collection of eggs and nests, what eventualities comes of them? They gather dust and are soon out of sight.

Remember the birds, boys, and give them a break. There would not be much music in this world without their merry trilling, would there?

The Scout Camp will be held jointly by the Hockley and the L.A. Legion Troops in the Red Deer River Valley distally at the mouth of the Three Hills Creek. A very nice site has been selected and the camp will be a success. It will be just as happy there as you were at the Morris Spring last year.

Don't forget to meet on Saturday at the Swimming Pool, at 7:30 p.m.

### THE GREEN GHOST\*

Your attention is drawn to an advertisement in this issue announcing the dates of the thrilling mystery drama "The Green Ghost" which will be shown in the auditoriums of the Bell Hall, Carbon, on both Friday and Saturday evenings, June 24 and 25, at 8:30 p.m. This play is being put on by the Carbon Drama Club, a group of the Girls' Branch of the C.W.A., and promises to provide plenty of entertainment. Do not miss it!

Mrs. B. Harding, who has been visiting with her parents, Mr. and Mrs. Halstead, for the past couple of weeks, left for her home in Lethbridge Monday evening. Her son accompanied her to the southern city.

## TO CELEBRATE OPENING OF SWIMMING POOL ON JUNE 29 WITH SPORTS

Softball, Baseball and Swimming  
Sports Will be Featured

### DANCE IN EVENING

To mark the official opening of the new Carbon Community Swimming Pool the citizens of the town and district are planning a big day of sport, Wednesday, June 29th.

Starting at 1:00 p.m. girls' softball games of six will be held in the afternoon for honours. At 2:30 p.m. the Junior baseball team of Rockyford will play the Carbon team, and again the main attraction at the new Carbon Community Swimming Pool will commence. These will consist of swimming races, relay races, and a Foot race will also be held near the pool for the kiddies, and for two hours there will be sun gals for the hours of water polo.

At 6:30 p.m. the Grainger and Carbon senior baseball teams will put on an exhibition game, after a swim session ticket or single admissions.

### SWIMMING POOL IS ATTRACTION

The Carbon Community Swimming pool is now open and over the week end a large number of swimmers enjoyed the warm water, which is now heated for the benefit of bathers.

Considerable work has been done at the pool this spring, and shower baths are provided for the bathers.

The park is being cleaned up,

and a new plan is being made to bring a big sports day planned for June 29th.

The park is open to anyone desiring to take part in the various

sports and games.

Foot races will also be held near the pool for the kiddies, and for two hours there will be sun gals for the hours of water polo.

At 6:30 p.m. the Grainger and Carbon senior baseball teams will put on an exhibition game, after a swim session ticket or single admissions.

Delivering his fifth budget speech, Hon. George H. Strange, Minister of Finance, Thursday informed members of the House of Commons of the financial status of the nation. He found it sound internally but he was cautious in regard to the financial situation upon Canadian economy of world factors.

### HIGHLIGHTS OF THE BUDGET

No increase in major taxation rates. No changes in excise taxes for the first time since 1912.

Estimated projected deficit for 1938-39, \$22,900,000.

The eight per cent sales tax revenue is widened to take in all major materials used in house construction. Other exemptions are designed to benefit farmers and fishermen.

No change in excise tax rates. Tax will not apply to tires and tubes when as original equipment of cars, trucks, motor trailers or motorcycles.

No change in income tax rates for individuals or corporations. The gift tax is raised all along the line and one exemption widened.

Attempts made to catch tax dodgers who are逃避 paying or use foreign companies to evade income tax.

Small loan companies to be subject to full income tax rates.

Estimated revenue in 1938-39, \$501,700,000.

Expenditures budgeted for 1938-39, \$524,600,000.

Official estimate of Canada's national income for 1937, \$4,820,000,000, an increase of 13 per cent over 1936.

### CREATED WHEAT GRASS MAKES BEST PASTURE

Experimental work conducted at the Agricultural Experimental station at Moccasin, Montana, and at the Dominion Barley Experiment station at Manversberg, Ontario, has proven conclusively that for pasture purposes on our short grass prairies, that the created wheat grass is better than any other grass and is also superior to our native prairie pastures.

At the Montana station the average annual precipitation is 15.23 inches or approximately the same as in the Lethbridge district. In 1932, 25 acres were seeded to create wheat grass to be grazed and another 25 acres left as native pasture. These fields were all grazed during 1934 and 1935, and the results showed that the grass in the spring as the grass was ready for grazing and left on until October, ceased to grow and went to seed.

It was found that the created wheat grass and the brome were ready for grazing on April 20 in 1934 and on April 10 in 1935. The brome was not ready until June 20 in 1934 and until May 23 in 1935. The cattle continued to make gains on the created wheat grass and the brome for 125 days and on native pasture for only 56 days.

The average gain per head while on these pastures was as follows:

On created wheat grass ..... 1.84 lbs. per season

On brome grass ..... 249.2

On native grass ..... 114.6

These results show the superiority of the created wheat grass over the native grass of the native sod for pasture purposes.

The average gain per head while on these pastures was as follows:

On created wheat grass ..... 1.84 lbs. per season

On brome grass ..... 249.2

On native grass ..... 114.6

These results show the superiority of the created wheat grass over the native grass of the native sod for pasture purposes.

The little items of local interest

Mr. and Mrs. Jasper Rochester were Sunday visitors in Carbon.

I. Gutmann spent a couple of days in Calgary this week.

Mr. and Mrs. Len Penon spent Monday and Tuesday in Calgary.

Mrs. Lemay returned Tuesday from Trochu, where she visited with relatives.

Mr. Buyer is residing in the Bank of Montreal while Mr. Smith is on his holidays.

## SPORTS

### JUNIORS WIN FROM ROCKYFORD

Friday evening the Rockyford Junior baseball team played the Carbon Juniors at the local diamond, winning by a 20-5 score. The Carbon Juniors were beaten in the closing half, and errors on the part of Rockyford players resulted in a number of runs for the locals.

### DEFENSE BEISEKER

Friday practically crippled, Beiseker had the local diamond in a 5-6 tie. However, the Carbon Juniors had teams up on capably and very few hits were allowed by the pitchers. The only hit of the night was a single by Carbon, the home team second in one, the second, and in the fifth, in the seventh, and one in the ninth.

During the game Carbon players were successful in completing three double plays, and the whole team was a fine example of teamwork.

This was Carbon's sixth straight win in the League and now having suffered defeat so far this season, the team is at the head of the Highways League.

A team of ups and downs were as follows: Carbon, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, the team, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

For the Carbon Juniors, 6-1; Rockford, 2-1; R.M. Wald, 2-1; C. Hazel, 2b; C. Grelf, 1b; J. Chisholm, 2b; S. Kruger, of; H. Wick, 1b; C. Brewster, c.

**A Vital Issue**

With the march of time and as the question becomes increasingly vitalized in the press and on the public platform evidence emerges that many conflicting viewpoints will have to be reconciled or compromised before the Canadian constitution is amended or reformed to the satisfaction of the people generally.

Until the report of the Royal Commission on Dominion-provincial relations is received it would be futile action on our part to assume that there is generally of the opinion, that considerable weight will have to be given the commission's recommendations, whatever they may be before the first steps towards the revision can be taken.

No decision will be soon taken yet before the Canadian government gives its final endorsement on the importance of the importance when it is remembered that widely varying opinions have been submitted to that body to date and when the fact is taken into consideration that their decisions, if implemented, are going to involve the future welfare of the entire nation for many generations to come.

Even after the commission has submitted its findings to Parliament, there is little doubt that some considerable time will have to be devoted before public opinion can be sufficiently crystallized to enable the representatives of the people to decide what program should be followed if the desired objectives are to be achieved.

**Most Brain Fundamentals**

The course that must ultimately be pursued, if the amended constitution is to be really effective, must not only reconcile a wide range of opinion, but must ensure that the new instrument is sufficiently elastic to enable it to meet future requirements in an ever changing viewpoints and of rapidly progressing and yet must be strong enough to ensure the retention of certain well established, fundamental democratic principles.

Playing in mind these facts, or rather, these requirements, those who have had the privilege of hearing or reading the addresses which have been made recently by Vincent C. Massey, the Canadian High Commissioner to the State of Dahomey, can easily appreciate how impressed with the immensity of the task ahead, of the far-reaching effects of the decisions which will ultimately be made and, therefore, of the necessity of the work being placed in the hands of men who will not be swayed by political considerations, by the moment, but who are capable of bringing to bear their conscientious, vigorous and courageous judgment.

Some of the fundamental principles which underlie the act of union and which must be incorporated in a revised constitution, as Dean MacDonald says, are the preservation of minority rights and retention of provincial autonomy.

The necessity of maintaining these two important principles can readily be understood in the light of the necessity of providing for a revised constitution which will meet with the approval of all sections of the country.

While in any democratic regime the will of the majority must prevail, as the same time there are minority groups who have accorded rights and privileges, and these must be safe from their continuance if harmony is to reign. When it is made abundantly clear that there is no intention of doing anything else but safeguard such rights some of the opposition to constitutional amendments will disappear automatically.

**Obstacles To Overcome**

Instancing some of the problems which have to be solved before a satisfactory revision can be implemented, Dean MacDonald pointed out that there are several obstacles to be overcome before even the necessary initial amendments can be made operative.

The first is the fact that the British North America Act is a statement of the Imperial Parliament and it is impossible to change it except through that Parliament. The second is in the political theory that Confederation is a contract and that, therefore, the terms can be changed only with the consent of all provinces—something so far impossible. The third is the difference of opinion regarding the right of colonies to amend their charters which will have to be harmonized or compromised. For instance, as Dean MacDonald pointed out, there are some people who believe that Canada should get whatever amendments are required immediately. "Others would first secure the power to amend the act so that the fact that some bills have the power to amend should be acquired by Canada so that amendments could be made here while others believe the amending power should remain in London."

Enough has, however, been said to give point to the comment that the task is a big one and the decisions which may be reached must be to the greatest possible impact to the future welfare of the Dominion. On these results hinge the future happiness and prosperity of a young and vigorous nation and the contentment of millions now living and millions yet to be born.

**Musée As Unifier**

Music, art, Hugh Robertson told the Association of Canadian Clubs, is the best "unifier" Canada could have. The distinguished adjudicator and director of the famous Orpheus Club says that the Canadian Clubs throughout the Dominion might aid in the propagation of culture, a difficult problem in a new country.

Speed King (as he showed down a bit): "Gosh! Don't you feel glad you're alive?"

Passenger: "Glad isn't the word. I'm amazed."

**Story About A Goat**

Nanny dranks a pun of gineline and then exploded. That's the story of Arnold Garlo and Melvin Miller, tenant farmers of Carlinville, Ill., as they explained the tale of their pet goat. The goat decided to toss the mated men lighted his pipe and tossed the mate to the ground. Nanny snuffed her whiskers ignited. Blowie. Nanny doesn't live there anymore.

Applicants must be British subjects and qualify under physical standards set by the Department of Transport. Before beginning his second year, the student must have obtained at least a private pilot's certificate.

**Famous Soilless Farm**

**Han Produced Its Fourth Successful Crop in Wake Island**

Wake Island's famous soilless farm built to provide fresh vegetables for maintenance men and Pacific Clipper passengers and crew members making a scheduled stop there on their flights across the Pacific, has already produced its fourth successful crop, Pan American Airways reports.

During the first ten days of May, approximately 1,000 pounds of lettuce, 20 pounds of radish, 20 pounds of squash and 44 pounds of corn were harvested from the shallow water-filled trays in which the crops are grown.

Wake Island's "farm" is cultivated according to methods worked out by Dr. W. F. Gercke of the University of California. In hydroponic farming as the method is called, water contains all the nutrients required by the place of soil. High yields of vegetables can be grown in surprisingly small areas. Wake Island's small area and the expense of shipping or flying in food supplies make adoption of the system there imperative.

**HARD LUMPS CAME ON HER LEGS****Ankles and Feet Swollen With Rheumatism**

Rheumatism sent this woman to bed with humps, swellings, and inflammation. Yet these symptoms disappeared as soon as she did when the root cause is removed. This letter tells you the method she used:

"I was taken ill with terrible rheumatism and pain in my legs. They were badly inflamed, swollen, and they were partly covered with red, hard, lumpy, sore skin. I could not walk or move about because of the ground was always. After I had been in bed for 16 days suffering from rheumatism, I found that I could not go on suffering like this, let us try Kruschen Salts." He got a bag of Kruschen Salts and applied them to the affected parts. He got the full benefit. Before long, I was completely relieved—swellings, inflammations, and pain gone. I am up again and doing my housework."

Do you realize what causes a good deal of rheumatic pain? Nothing but tiny, sharp, hard, rock-like crystals which form as the result of constant elimination of wastes by the kidneys. Kruschen Salts have always been counted upon to clear these painful crystals from the sys-

**A Perfect Quartz Crystal****One of Largest and Finest Was Mined in Brazil**

Ending in a jagged point more than 7,000 miles on mule-back, boat and railroad, a sixty-three-pound perfect quartz crystal, one of the largest and finest ever mined, arrived at the Bausch & Lomb Optical Company, Rochester, N.Y., from a mine in the province of Minas Geraes, 1,500 miles from the Brazilian seacoast.

Found in a region famous for its gem stone output, this giant crystal of quartz is one of the few identified with scientific and will be used in the manufacture of special lenses for microscopes. Quartz, unlike glass, provides visibility, and consequently is used to extreme exaggerations. Scrap quartz of high quality, left over from lens and prism manufacture, is used as part of the "melt" in making optical glass.

**Teach Aerial Navigation****Diploma Course Established By University of Toronto**

Establishment of a diploma course in aerial navigation was announced by the University of Toronto. Honor matriculation will be necessary for admission to the course, which begins October 1.

Instruction in mechanics, applied mathematics and other aviation will lead to qualifying examinations for commercial and transport pilots, navigators, dispatchers, operating mechanics, and radio communications courses will cover two years.

Applicants must be British subjects and qualify under physical standards set by the Department of Transport. Before beginning his second year, the student must have obtained at least a private pilot's certificate.

**Millions Of Refugees**

There are now 60,000,000 refugees throughout the world, according to Josephine E. Roosevelt, national chairman of the United Council for Civilian Relief in China, estimates. Most of these, she said, are without food and "facing epidemics constituting the greatest health danger that the world has met since the black death of the midges age."

The population of Wales, which shows a steady increase for 12 years has been decreasing for 16 years.

What seems unusual takes place, many motorists quickly park their cars and join the crowd. The result often is a traffic jam and many hazards.

**The King's Gift To Boston**

**Oak Sapling From Windsor Park To Boston**

An oak sapling from Windsor Park, a gift of the King, will be planted on Boston Common, in Massachusetts. It is being carried to the city by members of the Royal Engineers of the Honourable Artillery Company, who will take part in the three-hundredth anniversary celebrations in Boston of their regimental officers, the Honourable Artillery Company of Massachusetts, which was founded in 1638 by a London member of the H.A.C. who sailed to New England with the Pilgrim Fathers.

During the first ten days of May, a delegation from the American regiment came to London to honor the four-hundredth birthday of the H.A.C.

The King is the namesake of both regiments. Captain General of the H.A.C. and honorary member of the Massachusetts company, and his gift of an oak sapling will be accompanied by a bronze tablet bearing the Royal Arms and a suitable inscription.—Manchester Guardian.

**Giant Airplane****United States Army's Newest Bid For Speed**

A land plane, capable of flying to Europe and back, without refueling is a guarded military secret. The Douglas Aircraft plant in California. The world's largest bomber is the army's newest bid for speed.

Astoria circles are confident the new Douglas, when completed, will span almost 250 feet from wingtip to wingtip and will weigh about 160,000 pounds.

This would be nearly twice the wingspan and thrice the weight of any land plane yet built. That also would be the answer to the United States' need for a long-range striking force in the air.

If adapted to peacetime use, the plane would be in the 100-passenger class of airliner.

Largest land plane in the world is the army's Boeing XP-15, with a wingspan of 150 feet and gross weight of more than 60,000 pounds.

# Severe Drought In Europe May Be Ally For Peace On Account Of Wheat Shortage

Peace has been the ally in the drought—in some areas the worst in generations—which has swept Europe this spring and drastically reduced wheat crops, despatches indicated.

Not only has the drought interfered with plans to build up wheat reserves, but it has forced some nations with the unexpected problem of buying wheat abroad in tremendous quantities for normal consumption.

Ratio bought another three cargoes of wheat on the Baltic exchange in London recently, supplementing nine cargoes bought in the previous two days. Baltic exchange members predicted that Greece and Portugal would have to make similar purchases.

Emphasizing the effect of the drought, a United Press despatch from Rome quoted a usually well-informed source as saying that as soon as an Italian delegation returned from Berlin, where it negotiated a commercial and tourist accord, it would open trade and economic talks with Russia—target of the pro-German-Japanese "anti-communist" alliance.

The despatch said that despite unfriendly relations with Russia, Italy expected to purchase at least \$100,000,000 worth of wheat from the Soviets after the coming harvest.

Despite late spring rains, the despatch said, the long, severe drought throughout the Italian peninsula badly affected wheat which could oblige the Italian government to import foreign wheat in large quantities to meet internal needs.

The most optimistic Italian crop estimate put the total yield at 6,000,000 tons, which is 2,000,000 tons short of home consumption needs.

As contrasted with Italy, France enjoyed a bumper wheat crop, even though, with shortage in all food cereals has caused the government to take measures to increase imports.

The French national wheat office announced, a United Press despatch said, that a wheat surplus of 900,000,000 quintals (approximately 9,000,000 long tons or 330,000,000 bushels) was anticipated. The official figure, which is 5,000,380 hectares (12,500,000 acres) had been plotted for May 1, compared to 5,154,000 hectares (12,736,000 acres) May 1, 1937.

Experts forecast that a bumper crop might not be necessary for some countries—particularly the so-called totalitarian states—to divert funds from armament programs to wheat production. The result, however, might affect some countries by causing a drain on resources, such as native描绘的

as Germany, which could be compelled to return the corn to the Government if not properly handled.

## Canada's Reindeer Herd Is Increasing In Numbers

Progress reports on the fawning of Canada's reindeer herd, just received by the Department of Mines and Resources, Ottawa, reveal that approximately 1,181 deer calves and fawns had been added to the herd since the first week of May. Fawning began about the first of April and was expected to continue until about the first of July. Canadian game will not be available until the July round-up, but a marked increase over the 1,181 deer born last year is indicated.

The herd has shown steady growth from the original 2,770 reindeer delivered to the reindeer station in the Mackenzie Delta area in 1935. Notwithstanding the usual losses incurred in the first year, the annual slaughter of surplus stock (steers and aged females) to provide food and clothing for local needs, the deer numbered more than four thousand at the last round-up. The animals have adjusted themselves to the climate and local conditions on the reservation, and the herd has now developed to the stage where extension of the reindeer industry in the interests of the Eskimo population is receiving serious consideration.

Several Eskimos have been in training with the Government, herding the reindeer and having charge of the native herd and to increase the opportunities for the younger natives to learn reindeer husbandry. The plan being considered at present is to have the native herd and place them in charge of two native families under the supervision of a Government officer. These deer would be moved gradually eastward in the general direction of the Coppermine River, the ultimate destination being the Arctic coast.

It has been suggested that they spend the first year at least in the vicinity of Anderson River, about one hundred miles east of the Reindeer reservation, where a permanent camp is to be established later. It

**WHEN THE PAPER DOESN'T COME**

My father says the paper he reads isn't printed right.

He means it looks too, too, he does.

He says there ain't a single thing it worth to read.

And that it doesn't print the kind of stories that interest people.

He toots his nose and says it's strictly on the bum;

But you ought to hear him holler when the paper doesn't come.

He reads about the weddin's and he snorts like all getout;

He reads the social doin's with a moderate shout;

He toots his nose, papers for the women folks alone;

He'll read about the parties and fun and fret and groan.

He says of information it doesn't come a crumb.

But you ought to hear him holler when the paper doesn't come.

It is a real sin to grab it and read it plumb clean through.

He doesn't miss an item or a want ad—that is true;

He says you don't know what we are goin' to eat, the newspaper guys;

I'm goin' to take a day some time and go and put 'em wise;

Sometimes it seems as though they must be deaf and blind and dumb;

But you ought to hear him holler when the paper doesn't come.

—Cambridge North Star.

Boys make a better church than any other collection of soprano voices, said Dr. Sydney H. Nicholson, director of the English School of Church Music.

THE LATEST OF THE WINDSORS

The new photograph of the Duke and Duchess of Windsor was taken when they departed from the Memorial Day services in a Paris church, prior to departing for the Riviera before their visit of King George and Queen Elizabeth.

## Advantage Of Plain Food

Lifes In Early Days Of The Yukon Described By Mrs. George Black

"Sometimes I think I was born too soon, and again that I was born too late," Mrs. George Black, Conservator of the Yukon, told delegates to the third annual convention of the Canadian Dietetic Association in Ottawa. "In my 72 years I have seen some remarkable changes in the world."

"When I went to the Yukon in 1898, the only things I was able to make successfully were cream pie, Mr. George's food cake and salad dressing. On discussions about problems of the place where Ireland's patron saint landed more than 15 centuries ago to conduct his first mission,

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Manitoba.

There is a Alice Brooks pattern book published.

# Will Study Possibilities Of Converting Solar Radiation Into Electrical Energy

## Financiers And War

History Should Give To Show That War Impedes The Nation

The great industrialist of his age, and undoubtedly a public benefactor, Henry Ford is not good at history. Nor are his judgments outside industry always sound.

Recently, Ford talked to reporters, and one of the things he said was this:

"Somebody once said that 60 families controlled the destiny of the nation. It might well be said that if somebody would focus the spirit on the persons who control the nation during the world's real body blow, those who would bring about the peace should be brought into power."

But why should those alleged persons "who handle the nation's financial wands" be what good would bring about peace?

War, in the last analysis, can enrich anybody. As waged in this age, with its threat of bankruptcy for all nations, and with its consequence of impairment for whole populations, war is a terrible waste.

Always to a degree, it has been so. The Napoleonic wars while England won and France lost, enriched England working out of a state of poverty so that the conditions of our unemployed to a terrible extent by comparison like affluence. The War of 1812 brought a terrible waste to the United States. Under such conditions, neither industry nor finance can prosper. The last examination

the prosperity of finance and industry depends upon the welfare of the masses. When Spanish iron was imported at a price of 100 dollars per ton, Spain was the richest country in the world until she made war on the England of Elizabeth, since when she has been the poorest.

World industry and world finance have not yet recovered from the upheavals of the Great War. They might well be extinguished entirely if we do not bring them clear circumstances, to talk of a lead of finance plotting another war to talk less than common sense."

—Otawa Journal.

## Digitized Modern Ways

Eighty Seven-Year-Old Redhead Lived Alone And Liked It

Mrs. Nancy Thompson, 87-year-old redhead who lived on a 300-acre farm only four miles west of Perry, Michigan, died yesterday at her home. She was 87 years old when she went to town 30 years ago when she was unable to care for herself.

Frances J. Doyle Jones, Irish

sculptor, was commissioned in 1934 to design and erect the memorial. He completed the work shortly before his death last May 10.

Campbell's Hill, Dublin, Down district, the statue stands on a hillside overlooking Strangford Lough. Below the main monument an altar, or mass rock, has been built into the side of the hill.

**Contributed By Celebrities**

Woman Made Quilt Out Of Scraps Of Their Wearing Apparel

An energetic woman in Chicago who wears nothing but scraps of worn-out clothing was apparently so fond of mending that she has made a quilt out of scraps of worn-out clothing. Recently, she showed the efforts of her needle and thread to a group of neighbors who considered her a bit odd. Agnes

What proportion of the world's energy is used for war purposes and what for civilian purposes and under what conditions? and that the research program may be divided into three major fields of investigation: study of the direct use of solar energy; development of solar power, study of the possibility of using electrical apparatus to convert solar radiation into electrical energy, and study of chemical conversion of sunlight into forms available for work.

A committee for scholars will direct the research. Meanwhile, it will call upon householders to turn over their coal bins and contract for their fuel oil for the winter of 1938-39. New York Sun.

**Twenty Years Late**

Postcard Long Time To Reach Its Destination

It has taken a post card, from Des Moines, Iowa, nearly 20 years to reach its destination, San Francisco. Mailed by his son, Mrs. F. Mountjoy, it reached Bethuna Monday, June 6. Both sender and receiver are dead. The card depicts a scene in a Chinese restaurant.

What may be suggested by the fact that the post card took more than six years to make, and holds some 10,000 stitches?

Postcards have been contributed by celebrities in all walks and callings, not excluding royalty and highly-placed dignitaries in many countries.

**A Valuable Find**

A party of amateur paleontologists searching for fossils discovered rich deposits of fossilized fish near Lake Ladoga on the borders of Russia and Finland. The discovery is of such importance that experts of the Paleontological Institute will carry on excavations.

**To Erect Cairn**

The Historic Landmarks Foundation of Canada is planning to erect a cairn at Baie Verte, N.B. to the Abbe Le Louvre, French missionary, who made Chignecto his headquarters in 1719.

## WORLD HAPPENINGS BRIEFLY TOLD

Sweden marked the 80th birthday of King Gustav by establishing a national fund for fighting infantile paralysis.

Two research workers reported a slow, steady spread of undulant fever was making it one of the major disease threats in the United States.

The Canadian Government collected \$34,000,271 in forest revenues last year, larger than any year since 1929. Hon. A. Wells Gray, lands minister, said in his annual report.

Malcolm MacDonald, colonial secretary, told the House of Commons the government is considering sending more troops to Palestine to maintain order.

While nearly 900 revellers danced on a night club held up Miss Malia, wife of captain of the Faials Royale dance hall in Toronto, and escaped with \$350.

Only man to swim the English Channel both ways—France to England, 1927; England to France, 1934. Bill Newell is retiring after 20 years' competitive swimming and water polo.

Don McLeod of Winnipeg, believes he holds the long-distance record for model aircraft. His plane, with a motor, can fly 1,000 feet at a time. A pipe flew from Winnipeg to Starbuck, Man., a distance of 33 miles.

The Canadian Tuberculosis Association's 18th annual meeting in London, Ont., last week saw sales of Christmas seals in Canada to aid tuberculosis control work increased 13 per cent last year over the previous year and bettered all previous records.

Dishfranchisement of relief recipients after they had received public assistance for two years was advocated by W. C. McKinney, Manitoba supervisor of municipalities, in an address before the western district union of Manitoba municipalities.

### The Hawker Hurricane

#### Fastest Fighting Plane In Air Force Service Belongs To Britain

Britain has now in commission the fastest fighting machine in service in aerial warfare. In the Hawker Hurricane, the fastest plane made the trip to Edinburgh at 408 miles an hour, but that has been kept on the semi-secret list until just recently. Now it has been issued to the squadrons.

On its record-breaking trip it was helped by a strong tail wind, and its real top speed is not known to any exactness. All military and the pilots, but everyone can run to between 300 and 335 miles an hour. This would give it 280 miles as cruising speed for patrol work. Its tank capacity is 100 gallons, so it can do 700 miles without refuelling, a record achievement for its kind.

It can climb to 15,000 feet in six minutes and to 30,000 before the rate of climb drops to 100 feet per minute. It weighs 21½ tons, twice its undercarriage beneath it. When it takes to the air, carries six Browning machine guns and is considered a handly little thing to have around when heroes come over. The British people saw it in action on Empire Day—Toronto Telegram.

### Carried Out His Promise

#### Another Of Roosevelt's Ads Editorial Page Made Into Coke

Robert Jones, an admirer of President Roosevelt, thought newspapers were too critical of his policies. He argued that if he would let him write an editorial in a newspaper, that paper would print it. That spoke kindly of him. The Dallas Journal carried an editorial praising a proposal of Mr. Roosevelt. Jones took the editorial page to a newspaper and it contained a headline and dextroin and baked into a cake. In the presence of a party of friends, including Lynn Landrum, author of the editorial, he ate the cake.

The production of oranges and grapefruit is extending in Palestine. Last year citrus fruits accounted for 83 per cent of the country's exports. Already this year, more than eleven million cases have been sent away, about a million more than last season.

Most of the weather used in aircraft to-day are Soles make. These instruments must function perfectly in temperatures changing from plus 33 to minus 10 in a few minutes.

Five billions in gold and a billion in diamonds have been extracted from the African continent.

More than 21,000 of a total of 22,459 homes in Bournemouth, Eng., have radios.

### Get Rid Of Fleas

#### Not A Single Fly Should Be Permitted To Live

When you consider millions of flies that could be found in even one single female housefly is allowed to mature, it is obvious to what extent these carriers of "typhoid" and other disease germs are a menace to any community where they are permitted to multiply.

Fleas are no respecters of persons. The baby in the millionaire's home or the pauper's home are equally dangerous if proper care is not exercised to keep fleas from entering the home. Fleas frequent the filthiest feeding places outside the home, then, if allowed inside, carry dangerous germs to feeding babies. Liquids, foods, everything that is left exposed.

The important question then is, how can we get rid of fleas? The potential breeding places must be cut-offs, around the house. And, to make doubly sure, screen all windows and doors and cover all milk and food containers. If all these precautions were followed by everybody, it would go a long way to solve the fly problem. But, we are most of us apt to be thoughtless of others, perhaps, and so the flies have a new lease of life.

If flies do get into your home, a clean, quick way to kill them as they come to place Wilson's Fly Powder in a cotton ball. This is the best way to get rid of flies. Just a little care and thoughtfulness for the other fellow is the way to make health authorities dream of a less costly community come true.

### Cape Flocks Are SLIMMING

By Anna Adams

Fashions critics "Bravo" to Anne Adams' slimming new cape designs, compare with those of Patr. 4830! How cleverly it gives the figure new slenderness, and the centre back sections are eased into the pointed waistline, which produces an unusually flattering softness.

Make the cape in self fabric—a tiny bit of lace at the neck (or a lace face, if you want contrast), with the neckline how to harmonize, the hemline how to emphasize, the brief sleeves, will have a frisk to wear everywhere, and may say to the world, "I am slim!"

Pattern 4830 is available in sizes 34, 36, 38, 40, 42, 44, 46, 48, 50 and 52. Sup. 36 takes 4½ yards 29 inches.

Sew twenty cents (20¢) in coins (stamps cannot be accepted) for Size, Name, Address and Style Number, and send to: Dept. W, American Pattern Company, 175 McDermott Ave. E., Winnipeg.

### Bought Personal Things

When Indians received treaty money at the Pas, Man., most of it was spent for personal adornment. They would buy such articles as rings, cheap handkerchiefs, cheap eye-glasses and some finger-nail polish. The men went for silk socks, neckties and rubbers to wear over their moccasins.

### Denied Use Of Malls

In the 12 months ending May 31 instructions were issued by the Canadian government that all public places—such as shopping malls—must be open to the public. Hon. D. E. Euler, Acting Postmaster-General, said in answer to a question in the House of Commons,

"About 106 boys are born for every 100 girls."

"Curse! If that wrench hits me I'm a goner!" —Politiken, Copenhagen.

### Motor Accidents Appalling

#### 106,000 Lives Lost in United States

In 1937

The National Safety Council announced accidents in the United States claimed 106,000 lives in 1937, a total of 1,000 deaths as large as a nation of America. In the Great War, injuries at least 9,000,000 persons, at least one member in every fourth family.

## WHAT HO! — By RICHARD CONNELL

By Arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER XIII.—Continued

"I warn you, Punder, that deficiency of character is a dangerous pastime," hissed Sir Peter. "There are laws—"

"You should know about the laws," snarled Punder. "You kept just as long as you could go off your high horse, Pete Tyler. You and your crowd are going to listen to some home truths."

Sir Peter and his cronies sat down, looking ugly and apprehensive. Ernest sat down looking blank.

"I wanted P.P.P. and you knew it," Punder fumed.

"That's not so," declared Sir Peter.

"How should I know?"

"I suppose you expect me to believe that you haven't got wind of the fact that I'm organizing E.F. and D.S.," said Punder.

"Never heard of it," said Sir Peter.

"Don't you know what is?"

"Empire Food and Drink Syndicate," said Punder, "and when it goes through—and it is going through, 90 per cent of all the companies in Canada will be taken into its fold. In Great Britain and her colonies will have to pay tribute to E.F. and D.S.—and that means yours truly."

"Really? And you wanted Wynco Park?"

"Well, I was thinking about your claim," Sir Peter said. "Well, why didn't you come to me? You knew I held a controlling interest in P.P.P."

"Because I knew you'd come to me," said Punder. "Well, you foisted me. You knew I'd drive a hard bargain so you rigged up this dummy auction and palmed it off to me."

"Never heard of it," said Sir Peter.

"And now that he's got P.P.P., what's he going to do with it?"

"His plans are surprising," Punder," said Sir Peter. "He's going to buy him out."

"And then?"

"And then," said Sir Peter, "I have been given to understand that unlimited capital is available in the States to back a corporation which will buy out Mr. Otto G. Wacoop—for example."

"Wacoop?" ejaculated Punder. "He heard of Wyncoop. Dashed good man, too."

"A slow train carried Ernest back to Penitentiary. On the way he took out his forgotten lunch. The cheese and pudding had become one grubby blob. He ate the mixture anyway. It tasted like ambrosia to him."

He indicated that they were prepared to tell a judge and jury that Ernest was guilty of a breach of promise and asserted that—

Then they strode out behind Sir Peter leaving Ernest in the clutches of Hubert Punder. Ernest would have ducked out through the door but Punder plugged it with his poundage.

"Talk," said Punder.

Ernest resumed his imitation of the Spanish Inquisition.

"I'll say something then," said Punder. "Just two words. How much?"

Ernest was as voiceless as a newt.

"You can't do anything with P.P.P. and the King," said Punder.

"This is just another piece of Yankee piracy. Well, speak up. What's the ransom?"

Ernest did not speak up.

"With your precious combines?" cried Punder.

"You and your unlimited capital? Going to buck me, hey? Going to match British concerns from under Punder's nose, hey? Well, you can't kick Punder around, see?"

Ernest began to see something quite clearly. He began to see that on that off-hand, informal way of natural to most Indians, he had been duped. That his case is based on reputation. Sir Peter and his fellow conspirators had sold him a property for two and a half million dollars, and Sir Punder wanted to buy it from him with no more compensation than if it were a pound of dog-biscuits.

Of late Ernest had faced the music so often that he had learned to take a comic note. He faced the music now, and it was sweet music. A hard, resolute smile came to his face, Mr. Punder saw it, Mr. Punder said,

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

The Earl grinned and bowed.

"Thank you, thank you, thank you," he said, taking his place at the head of the table.

"Great-aug-sixty," he remarked.

"Well, my son just enough to laugh at his youthful follies and just young enough to repeat 'em," said Punder.

## PAY YOUR SUBSCRIPTION!

## WHERE DOES ALL THE MONEY COME FROM?

MORE than four and one-half million depositors in Canada have "money in the bank."

They are satisfied to leave their money on deposit because Canada's chartered banks are ready and able to pay back promptly every cent when the depositor calls for it.

These deposits in the chartered banks total roughly \$2,362,000,000—approximately 10 per cent, of which they carry in cash—in other words Bank of Canada money or "legal tender."

Some people do not fully understand banking operations and might ask:

1. What have the banks got to represent our deposits if they do not give us cash?

2. How can the banks repay our deposits, over \$2,362,000,000, with the amount of cash they hold?

The answer to No. 1 is Look at any bank balance sheet and you will see for yourself that a bank has no cash in its vaults. That is to say—if all of its depositors were paid off and all of its other debts paid, a balance would still remain belonging to the shareholders.

That should answer your first question satisfactorily. And now for No. 2:

Look again at a bank balance sheet and you will see that in addition to the cash it holds, the bank owns assets quickly convertible into cash, or which can be used to meet obligations. Your gain is 18½ bushels equivalent to 18½ bushels equivalent to 18½ bushels, which you deposited in the bank.

Do you regard this as just figures in a book? It would be hard to convince any wage-earner or any professional man that he could not make a better return by investing his time and labour and taking out your costs—similarly, in matters, your gain is 18½ bushels equivalent to 18½ bushels, which you deposited in the bank.

It would be hard to convince any wage-earner or any professional man that he could not deposit which amount from his labour and production, is anything but real money.

He knows better, for he can hardly expect to earn more.

Where does all the money come from?

Your deposit is the measure of your own real wealth.

That wealth comes from the marketing of your labour for wages; from the application of labour to the soil of the farmer or to the standing timber in the forest; from the catching of fish in the sea; from the wresting of minerals from the ground; from the fabrication of raw materials into manufactured goods; and from marketing at home or abroad this continuous production.

When somebody wants to change all your business and economic methods and by some mysterious magic turn your overnight success into minimum of prosperity, ask what success such a theorist has made of handling his own affairs, before you listen to him.

Bank deposits reflect tangible wealth produced. Every dollar we owe to our—your—depositors is backed by many dollars in real assets.

Canada's chartered banks not only serve the individual well, they are a great factor in the building of the nation.

A heavy pall of smoke enveloped

the western part of the province this

week while forest fires north of Ed-

monton break out. It is claimed that

the fire situation in Alberta is the

worst since 1924. The smoke was so

dense on Tuesday morning that the sun could not shine through, although temperatures of nearly 90 degrees

were registered.

Empire Exhibition to Make 1938 Scotland's Year

A last year was England's, with Coronation and Prin-  
ce's with Paris Exposition 1938 will be all Scotland's, with the great  
Empire Exhibition.

George will open in the Scottish

metropolis on May 3.

With the opening summer

Canadian Pacific liners will land

visitors by the hundred at the

Empire's of Banff along

within sight of the exhibition

grounds in Bellahouston Park.

Not only will they see the exhibition, but all the sights around

these visitors attracted to Scot-

land and the big show will go on

from the 10th to the middle of the rest of Scotland.

Appropriately enough has been chosen

by the Canadian Society in Eng-

land, the scenic beauty spots that  
will be available to the public. This will  
be in a large party in Dickens of  
July.

In the natural beauty of Bellahouston Park, visitors will find the greatest show of Empire enter-

tainment ever seen in Britain. Art

and culture, music, dancing, comedy, etc.

At the left is a view of some of

the great buildings of the Empire

Exhibition, including the Canadian

and the Empire's of Engineering at the right.

green ones, blues, reds and yellow.

The open-air restaurants will

have brilliantly colored sunshades and awnings and at night the whole

area will be a picture of light and life.

the great buildings of the Empire

Exhibition, including the Canadian

and the Empire's of Engineering at the right.

**MOSQUITOS AND CONTROL**

At this season of the year the thoughts of fishermen, campers and others are turning toward the bucolic and sylvan pleasures of the great outdoors. Probably nowhere in the world are facilities for such enjoyment better for the average person than in Canada. Almost literally speaking, however, "there is a fly in the ointment"; in fact too many flies—black flies and mosquitos. These "winged demons of the forest," as one of the early Jesuit Fathers referred to them, occur in great numbers, especially in spring and early summer, in many otherwise attractive locations.

Fortunately there are certain simple precautionary measures that may be taken, which will do much to mitigate the discomfort and annoyance caused by these insects. These measures are discussed in a pamphlet, prepared by direction of the Dominion Entomologist, entitled "Methods of Protection from Mosquitos, Black-flies and Similar Pests of the Forest," and available

on application to the Publicity and Extension branch, Department of Agriculture, Ottawa.

Proper camping sites should be chosen away from marshes, swamps and stagnant pools, preferably where there are no dense woods or under-brush, which would serve as a shelter for the insects and break the wind. Fly-proof tents should be used and one of the popular brands of pyrethrum fly spray and a suitable automizer should be kept on hand to destroy insects that may find their way into the tents or other quarters.

Various protective mixtures are of great value in warding off attack, when applied to exposed parts of the skin. The following formulae have been used with satisfaction by many persons:

1. Oil of citronella, 3 oz., spirits of camphor 1 ounce, oil of tar 1 ounce, oil of pennyroyal  $\frac{1}{4}$  ounce, and castor oil 5 ounces.

2. Oil of citronella 2 ounces, castor oil 2 ounces, oil of pennyroyal  $\frac{1}{4}$  oz.. Among the remedies for relieving

insect bites is household ammonia, tincture of iodine, borated vaseline, glycerin and alcohol. In many cases irritation passes away when ordinary toilet soap is moistened and gently rubbed over the puncture.

**THEOLOGY AND POLITICS  
(By Rev. W.H. McDannold)**

Victorian writers like Swinburne wrote falsely in picturing Paganism of early Christian days "as serene, confident and self-assured." That is far from the truth. Nor is there any evidence that Paganism of nowadays is leaving folk very happy, confident or serene. Rather a grim hopelessness and helplessness has fallen upon many. Profound melancholy and self-distrust bordering in self-disgust were the characteristic attitudes of the old world at the time when it first discovered Christianity of which it was written, "Believeth all things, hopeth all things, endureth all things."

Paganism still offers to man an alien Universe in which there is nei-

ther security or fellowship or any grounds for optimism to the human spirit. Doubt about life gets into its blood-stream. Wherever paganism is the prevailing philosophy human life is easing to count as the real treasure which must be safeguarded at all cost.

"When the Gospel came into the twilight of the gods it set man erect on his feet and gave him back a life which was worth while. It revealed to him a spiritual universe with a will that cares for persons at the heart of it—the God and Father of our Lord Jesus Christ—and in which personal values are secure. All the despotism of history are built in disbelief in human nature." This rather long quotation of Canon Barry, whose book "What Has Christianity to Say" is the basis of much we are writing, neatly sums my convictions about the source and care of Life. Our gospel gathers us into the fellowship, of we the willing, on One who was "not ashamed to call them brethren and showed thereby that human life is a precious treasure in God's sight.

# Why is Life Insurance So Safe?

**Answer.**—Because the institution of Life Insurance is built upon a sound actuarial basis, and upon the investment of the accumulated funds of policyholders in loans to governments and municipalities—for building homes and schools—for improving farms—for constructing good roads and transportation systems—for developing industries and public utilities.

**Question.**—How is the safety of these funds guaranteed?

**Answer.**—By the security of the governments, municipalities and properties upon which the loans are made—and the financial responsibility of the borrower.

**Q.**—Are there restrictions as to what type of investments Life Insurance companies may make?

**A.**—Yes, all investments are subject to strict governmental regulation.

**Q.**—What is the total amount of Life Insurance funds invested in Canada?

**A.**—More than Two Billion Dollars.

**Q.**—Has Life Insurance in Canada fulfilled every guarantee 100 cents on the dollar?

**A.**—Yes, even through wars, depressions and worldwide depressions.

*This is the ninth of a series of messages sponsored by Life Insurance Companies operating in Canada. The tenth, to appear in two weeks' time, will discuss how women and children benefit from Life Insurance.*

### GRASSHOPPER THREAT

It would appear that the most threatened area is between Calgary and Lethbridge with an oval district extending between High River and Champion where a very severe outbreak may occur. A smaller area just north of Claresholm is also threatened and indications of heavy infestation are shown in the Milo-Arrowwood country.

Varying degrees of infestation are indicated from Tofield extending East and south through Stettler, swinging west to Olds and then south along the foothills right to the United States border. In the eastern side of the province, hopper eggs are present from twenty-five miles south of Lloydminster down to the Cypress Hills. A large area from Redcliff to Brooks on the east and west and from Howie Post Office to the Bow River, north and south, is indicated as free from grasshoppers.

While the Carbon district is not mentioned as an area in which the grasshoppers will be severe, it is believed that should warm dry weather follow within the next two weeks that the outbreak may be greater than anticipated. For this reason farmers are asked to keep a look-out for them and follow carefully the precautions of the department of agriculture, which are listed below.

1. Every few days from now on examine carefully all roadsides, headlands and weedy or abandoned fields and report discovery of any grasshoppers immediately to the municipal secretary.

2. Land to be summer-fallowed in 1938 should be cultivated shallowly early in the spring to bring egg pods to the surface where wind and sun may destroy them.

3. Do not sow stubble land. If absolutely necessary to seed stubble, it should be ploughed deeply.

4. Plough four rod guard strips along all stubble fields. Cultivate such fields from the outside towards the centre and poison the hoppers in the centre strip.

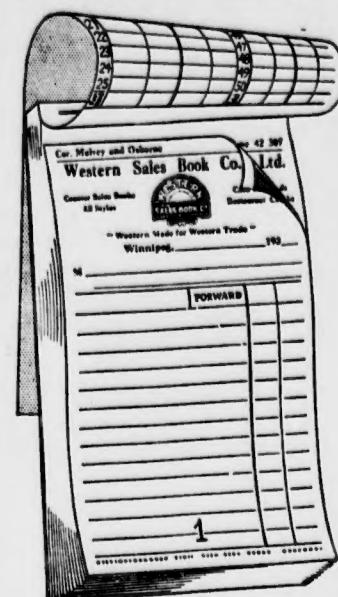

5. Grasshoppers feed only when the temperature is between 68 and 90 degrees F. in the shade, so poison bait should be spread while the sun shines.

The development of grasshopper plagues depend a great deal on the weather. A cold wet spring increases mortality among the young hoppers, while fine weather gives them a good start in life.

### DIVERS ARE WARNED

The fate of Betty Slade, 16-year-old British champion springboard diver, who is in hospital for a serious ear operation after taking part in a

diving competition in Holland, has led British doctors to issue a warning about the dangers of swimming and diving.

"Nearly ten per cent of the ear cases requiring operations are directly due to swimming and diving," a London ear hospital specialist said.

Women swimmers who rely on bathing caps or helmets, he said, are warned that these are not sufficient protection. Ears must be tightly plugged with cotton wool or special rubber plugs designed for the purpose.

A deaf old lady went to live near a naval station. Shortly afterwards, a battleship fired a salute of ten guns. The old lady, who lived alone, got out of her chair, smoothed her dress, patted her hair and said sweetly: "Come in."
